FROM: Lynn Kunzler, Reclamation Specialist *LK*

RE: Site Inspection, Interstate Brick Co., Snow White Mine, S/049/030, Utah County, Utah

Date of Inspection: June 29, 1999  
Time of Inspection: 9:00 a.m.  
Conditions: Partly Cloudy  
Participants: Jerry North, Interstate Brick, Lynn Kunzler, DOGM

Purpose of Inspection: To evaluate site conditions.

The site was currently inactive, although it has been active in the recent past. The site involve 3 small pits with associated waste dumps and pads. The southern most pit has disturbed 3.5 acres (determined with GPS unit), with about 1.5 acres having been regraded and ready for seeding. Mr. North indicated that he plans to remove the rest of the clay in this pit this fall and then finish the regrading and seed the entire area.

The middle pit is 2 acres in size (as determined with GPS unit). There is no immediate plans to do any reclamation at this time on this area.

The northern area has disturbed about 1 acre. Mr. North indicated that he plans to have all disturbances at his site reclaimed this fall and then he will open a new area to the southwest.

Mr. North was cautioned about the possibility of being over the five-acre limit for a small mining operation. The GPS data indicates the site is approximately 6.5 acres. Interstate Brick needs to be notified of the Non-compliance situation so that it can be corrected.

A GPS was used to determine UTM coordinates ( North 4176342, East 281232 ).

No photos were taken of the site.
